Business appetite and product contacts

An overview of Liberty's appetite for Casualty risks

Our focus on global specialist lines enables Liberty to provide a broad range of insurance solutions, with a capability to manage complex risks. If you are unsure of the categorisation of a specific industry, please call our team and we will be happy to discuss the risk with you in more detail.

Liberty offering

At Liberty we offer your clients policies that provide comprehensive coverage using wordings that are clear and unambiguous.

Construction is an area where we have considerable depth of experience. We have insured and led projects including but not limited to the following:

- Civil works for infrastructures (sewerage systems, electrical cables, railways, metro lines) involving tunneling
- Utilities (power, desalination plants)
- Refineries and petrochemical complexes
- Building (shopping malls, mixed developments, office towers) construction

For clients seeking tailored cover, we offer a wide range of extensions so you can deliver the exact cover your client requires. This includes extensions for financial loss, recall expenses, care custody and control, molestation and abuse, injury to participants and existing property. We also consider cover for phased handover, on a project by project basis.

Maximum capacity US\$50,000,000 for:

- Primary
- Excess
- Umbrella
- Construction Third Party Liability

All of Liberty's Casualty products can be offered on Claims Made or an Occurrence basis.

Risk engineering

Risk engineering is a crucial part of our long-term approach to client relationships. Our global network of risk engineers work with you to develop an in-depth understanding of the operational and safety aspects of each risk. Based on that knowledge we can offer to you and your client a more informed and tailored insurance product. This enhances overall risk control and benefits all parties.

Technical information

Asia continues to develop a claims culture, which means that your clients need to be advised by skilled knowledgeable brokers for their Casualty insurance needs.

At Liberty we offer presentations on all aspects of third party injury and damage liability. We have developed a number of presentations with brokers in mind, and we are happy to create something tailored to your specific request.

Industries

We've listed 60 trades on the reverse to help you understand our appetite. We have followed a simple traffic light system.

-  Our preferred industries
-  Further consideration is required before confirming capacity
-  Industries we typically do not participate in

Our target industries are:

- Rail (manufacturing and operational)
- Construction
- Product liability (appetite for North American exposure)
- Offshore construction (incl. contractors working offshore)
- Power
- Petrochemical
- Property owners
- Schools
- Sports associations
- Upstream energy
- Marine-related risks (construction, ship repairers, marinas, products liability)

- Preferred risks
- Selective risks
- Non-preferred risks
