Liberty's Marine Business Unit – Underwriting, Risk Management Engineers and Claims – reviews all shipbuilder risk submissions

Ship building is a key industry in Asia Pacific, with seven of the top 10 largest global shipyards, by order book, located in the region.

Liberty ensures all Shipbuilder's Risk submissions are reviewed by our Marine Business Unit, including Underwriting, Risk Management Engineers and Claims teams.

For major shipyards, a current and satisfactory JH143 Shipyard Risk Assessment (JH143) is considered mandatory at the time of risk submission.

Without a satisfactory JH143, Liberty may give a subjectivity provided that a satisfactory JH143 Shipyard Risk Assessment and/or a follow up JH143 is provided within a specified timeframe of policy inception.

For the smaller yards, our Marine Risk Management Engineers will visit the facility to conduct a Quality Operator Review (QOR) survey to assess the risk.

Coverage

Liberty continues to grow our Shipbuilder's Risk insurance product within the region and offers significant capacity. We cover loss of, or damage to, the hull and machinery of vessels under construction.

In addition to this, cover is also provided for loss of, or damage to, property belonging to others and for death or personal injury caused to third parties during construction.
